5-DAY COURSE

## What you'll learn

### Coffee Theory

Our course isn't just about technique. After day 1, you'll understand what few others do: what coffee really is and how brewing it works at the most fundamental level.

### Brewing Coffee by Hand

We start brewing actual coffee with manual techniques to give you more ways to experiment on your own.

### Your Home Bar

As we prepare to pull espresso, we help you figure out how to set up your home bar and understand espresso on a new level.

### Pulling Cafe Quality Espresso

For the first time ever, we've distilled our industry training techniques for the home brewer. You'll get our professional guidance to brew cafe quality at home.

### Milk and Latte Art

The last day of the course is where you prove your mastery. We move step-by-step to teach you how to steam perfect milk and draw latte art just like a professional barista.

## Why Choose Us
